

MISHECK KAMULONI

Full-Stack Software Developer | Digital Governance Specialist

Lilongwe, Malawi | kamulonim@gmail.com | +265 994099461

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer with 9 years of experience architecting and delivering enterprise-grade digital solutions across government, fintech, and development sectors. As Software Developer with UNDP Malawi's IDT4M project, specializing in microservices architecture, AI-powered systems, and cloud-native applications. Proven track record of building scalable platforms serving 1,000+ concurrent users, integrating advanced AI capabilities (Gemini API, sentiment analysis), and delivering mission-critical systems under tight deadlines. Expert in C#.NET Core, Node.js, React, Laravel with extensive experience in CI/CD pipelines, Docker containerization, and Agile methodologies. Passionate about leveraging technology for sustainable development and social impact.

CORE COMPETENCIES

- **Full-Stack Development:** C#.NET Core, Node.js, React, Blazor, Laravel, PHP
- **AI Integration & Development:** Gemini API, sentiment analysis, prompt engineering, AI-assisted coding (Augment Code, Claude Code)
- **Architecture Patterns:** Microservices, Repository Pattern, DTOs, Dependency Injection, Event-Driven Architecture
- **Database Systems:** MySQL, MSSQL, PostgreSQL, Oracle - optimization, ORM patterns, query design
- **DevOps & Infrastructure:** Docker, CI/CD pipelines, VPS deployment, Lando development environments
- **Telecommunications:** SMPP gateway development, USSD infrastructure, PBX integration (MTL)
- **Agile Methodologies:** SCRUM ceremonies, sprint planning, code reviews, stakeholder management
- **Digital Governance:** Identity systems, biometric integration, election monitoring, anti-corruption technology

PROFESSIONAL EXPERIENCE

Software Developer

UNDP Malawi - Inclusive Digital Transformation for Malawi (IDT4M) Project

September 2024 – 2025 September | Lilongwe, Malawi

- Lead developer for ACB Integrated Case Management System implementing microservices architecture for scalability and service reusability across government projects
- Architected and deployed Magwero, AI-powered media monitoring system integrating Google Gemini API for real-time sentiment analysis during Malawi's 2025 elections, successfully identifying misinformation patterns and violence indicators
- Developed Maso Athu election monitoring platform serving 1,000+ monitors nationwide with real-time incident reporting across security, gender, human rights, and MEC compliance categories; supported hundreds of analysts in election situation room for rapid investigation and response
- Built NRB Marriage Registration App digitizing civil registration services and NRB Call Center CRM with MTL PBX integration enabling automatic call routing, recording, and comprehensive citizen complaint tracking
- Expanded GBV Hub with district-level modules enabling NSO and Ministry of Gender to track gender-based violence case resolutions through social welfare, police, courts, and withdrawals
- Enhanced Village Action Plan (VAP) and Ward Action Plan (WAP) systems for Ministry of Local Government, empowering citizens to submit community development priorities with municipal analysis and approval workflows
- Deployed iVerify system for MISA Malawi (anti-misinformation platform) and Independent Complaints Commission case management system for tracking police-related abuse and misconduct

- Implemented CI/CD pipelines for automated testing and deployment, leveraging AI-assisted development tools (Augment Code, Claude Code) to accelerate delivery while maintaining code quality and security standards
- Provided deployment support and trainer training for DODMA's Disaster Risk Management system

Chief Technology Officer & Founder

Infovits LTD

April 2024 – September 2024 | Lilongwe, Malawi

- Founded and scaled technology company delivering 20+ ICT projects across agriculture, finance, and government sectors
- Developed comprehensive microfinance management system serving 7+ institutions across Malawi and Zambia, transforming Excel-based operations into scalable digital platforms
- Partnered with Agritrust to create farmer subscription app with automated SMS guidance for crop stages, revolutionizing agricultural advisory services
- Established strategic technology partnerships and built high-performing development teams through structured mentorship programs
- Implemented enterprise cybersecurity measures protecting client data across multiple industries

Senior Software Developer & ICT Manager

Wealthnet Finance

August 2018 – March 2024 | Lilongwe, Malawi

- Architected and secured Reserve Bank of Malawi approval for KAKUPAY mobile banking platform featuring biometric authentication (AFIS, Neurotech), role-based access control, and national financial infrastructure integration
- Developed complete SMPP gateway infrastructure from ground up integrating with multiple mobile network operators (MNOs) for bulk SMS and transactional messaging
- Built full USSD infrastructure including MNO connectivity and menu development, enabling feature phone users in rural areas to access village banking services and KAKUPAY digital wallet
- Pioneered rural financial inclusion by automating Village Bank Savings across Mchinji, Mzimba, Dedza, and Rumphi districts using USSD technology
- Integrated KAKUPAY with National Integrated Technologies Limited (NITEL) enabling utility payments for water bills and ESCOM electricity units
- Implemented VPN inter-branch connectivity across Wealthnet Finance locations enabling seamless file sharing and system access
- Increased organizational sales by 25% through innovative digital banking solutions and established comprehensive ICT governance framework

Software Developer

Ctech Systems

April 2017 – July 2018 | Lilongwe, Malawi

- Developed self-service water bill checking module for Lilongwe Water Board enabling public meter reading entry
- Built HR management system for enterprise client with comprehensive employee data management
- Trained LUANAR research team in SPSS for statistical data analysis

EDUCATION

Bachelor of Science in Information and Communication Technology

Mzuzu University, Malawi | Major: Systems Development | Lower Second Class

Malawi School Certificate of Education

Mulunguzi Secondary School, Malawi | December 2011

TECHNICAL SKILLS

Programming Languages: C#, JavaScript, TypeScript, PHP, Python, SQL

Frameworks & Libraries: .NET Core, Node.js, React.js, Blazor, Laravel, Angular (exposure)

Databases: MySQL, Microsoft SQL Server, PostgreSQL, Oracle - query optimization, ORM patterns, database design

Cloud & DevOps: Docker containerization, CI/CD pipelines, VPS deployment, Git version control

AI & Machine Learning: Google Gemini API integration, sentiment analysis, prompt engineering, AI-assisted development (Augment Code, Claude Code)

Architecture: Microservices, Repository Pattern, DTOs, Dependency Injection, Factory Pattern, Strategy Pattern, SOLID principles

Specialized Systems: Biometric integration (AFIS, Neurotech), SMPP gateway, USSD development, PBX integration, OAuth/JWT authentication

Development Tools: Visual Studio, VS Code, Lando, Docker, Git, Postman, Azure DevOps

CERTIFICATIONS & TRAINING

- UNDP Business Continuity Management Certification
- UNDP Risk Management Certification
- SGBV (Sexual and Gender-Based Violence) Technical Workshops - Data institutionalization in district development planning

LANGUAGES

English: Fluent (Professional working proficiency)

Chichewa: Native speaker

KEY PROJECTS PORTFOLIO

Magwero AI Media Monitoring System

AI-powered platform integrating Google Gemini API for real-time sentiment analysis of media content during Malawi's 2025 elections. Successfully identified misinformation patterns, hate speech, and violence indicators, supporting peaceful electoral processes.

Maso Athu Election Monitoring Platform

Comprehensive election monitoring system serving 1,000+ monitors nationwide with real-time incident reporting across security, gender, human rights, and MEC compliance. Supported hundreds of analysts in election situation room for investigation and response coordination.

KAKUPAY Mobile Banking Platform

Reserve Bank of Malawi-approved digital banking solution with biometric authentication, USSD integration for rural access, and national utility payment connectivity. Includes village banking automation serving marginalized communities across multiple districts.

ACB Integrated Case Management System

Leading development of microservices-based anti-corruption platform enabling anonymous citizen reporting and comprehensive case tracking for Anti-Corruption Bureau, with scalable architecture for government-wide deployment.

Microfinance Management System

Comprehensive digital transformation solution replacing Excel-based operations for 7+ microfinance institutions across Malawi and Zambia. Features loan management, client tracking, reporting, and financial analytics.

PROFESSIONAL QUALITIES

- Rapid technology adoption and continuous learning mindset - quickly masters new frameworks, languages, and emerging technologies
- Proactive problem-solving approach with strong analytical skills and attention to detail
- Excellent collaborative skills - effective communication with cross-functional teams, stakeholders, and non-technical audiences

- Proven ability to deliver complex systems under tight deadlines while maintaining code quality and security standards
- Strong commitment to leveraging technology for social impact and sustainable development goals
- Experience mentoring junior developers and conducting technical training for end users
